Appendix E

Appendix E
Capital Project Cost Estimate Variance

This appendix provides information on lifetime cost for each project in the proposed FY 2018 - FY 2023 capital budget compared to lifetime cost for the project through FY 2017. DC Code Sec. 1-204.44(1) requires identification of capital projects whose lifetime costs in the proposed capital budget increase by more than 5 percent compared to the previous year's capital budget. Appendix E excludes Federal Highway Administration funding since the project-based allocations for FY 2018 – FY 2023 are not yet determined. Projects are divided into four parts for presentation.

PART 1:

Existing Projects with FY 2018 Budget and FY 2017 Budget; FY 2018 Lifetime Budget Increment Greater Than 5 percent. This section lists projects that are the focus of the DC Code requirement.

- Many of these projects fund ongoing work, with additional budget added each year to continue this work. Examples include (1) short-term bond funded projects to purchase replacement vehicles in the Metropolitan Police Department and the Fire and Emergency Medical Services Department, (2) the street and alley improvement project in the Department of Transportation, and (3) the District's capital subsidy to the Washington Metropolitan Area Transit Authority.
- Other projects represent true cost increases, either because of an expansion in the scope of work or an increase in the cost relative to prior estimates for the same scope of work.

PART 2:

Existing Projects with FY 2018 Budget and FY 2017 Budget; FY 2018 Lifetime Budget Increment Less Than 5 percent (Or Negative). This section lists projects whose cost did not increase by more than the 5 percent threshold.

PART 3:

Existing Projects with FY 2018 Budget but not FY 2017 Budget. This section includes projects that were not part of the FY 2017 budget and thus are not the focus of the DC Code requirement. However, cost increases in the proposed FY 2018 - FY 2023 capital budget can still be calculated compared to previous lifetime budget.

PART 4:

New Projects in the FY 2018 Budget. Projects in this section are receiving budget for the first time in the proposed FY 2018 capital budget, so there are no comparable prior cost estimates.

Lifetime budget data through FY 2017 are the budget authority figures from SOAR, the District's financial management system.

Appendix E - Capital Project Cost Estimate Variances

Appendix H

Appendix H: FY 2018 - FY 2023 Highway Trust Fund

Overview

Approximately 199 of the District's bridges and 400 miles of District streets and highways are eligible for federal aid. The Federal Highway Administration (FHWA) administers the Federal-aid Highway Program and reimburses DDOT for eligible expenditures related to approved highway projects according to cost-sharing formulas that are established in authorizing statutes. In most cases the federal share of the costs for approved projects is about 86 percent. The District's share of eligible project costs is funded with the local Highway Trust Fund (HTF).

The proposed HTF Budget for FY 2018 through FY 2023 is shown in Table H-1. The total budget for FY 2018 is $200,937,599. It is anticipated that FHWA will make $173,173.599 of federal aid available for HTF projects. The budget proposed for the local match is $27,763,000. The proposed local HTF budget is based on estimates of local HTF revenues and anticipated local match requirements. Additional local budget of $1,000,000 is proposed for HTF support costs that are not eligible for federal reimbursement non-participating costs and certain administrative costs. Effective in the FY 2018 budget year, the District Department of Transportation is using a local master project to request this local portion of the capital budget.

The Federal Highway Support project, which is the local master project, includes two subprojects; the Non-Participating Highway Trust Fund costs and Administrative Costs Transfer. Non-participating costs include overhead and other costs that FHWA deems ineligible for federal grant funding. Overhead costs are incurred for positions that support the FHWA capital program but are ineligible for direct grant funding due to FHWA regulations. These labor costs are allocated to local funding for capital infrastructure projects based on the direct labor charged to the individual project. Other non-participating costs are for infrastructure improvements or equipment used on capital infrastructure projects that FHWA deems non-essential for the grant purpose but are necessary to complete the task. Costs that are reimbursable from other parties, such as Pepco or DC Water and Sewer Authority, may also be financed as non-participating costs.

The sources of funding for HTF projects, excluding non-participating costs and administrative cost transfer, are detailed in Figure H-1. The federal share of project funding is anticipated to be 86 percent and the local share is expected to be 14 percent. The local share is derived primarily from motor fuel tax revenue, which is supplemented with rights-of-way revenue, as needed to meet local match requirements. Fund balance is available to be used for any additional local match needed beyond the 14 percent.

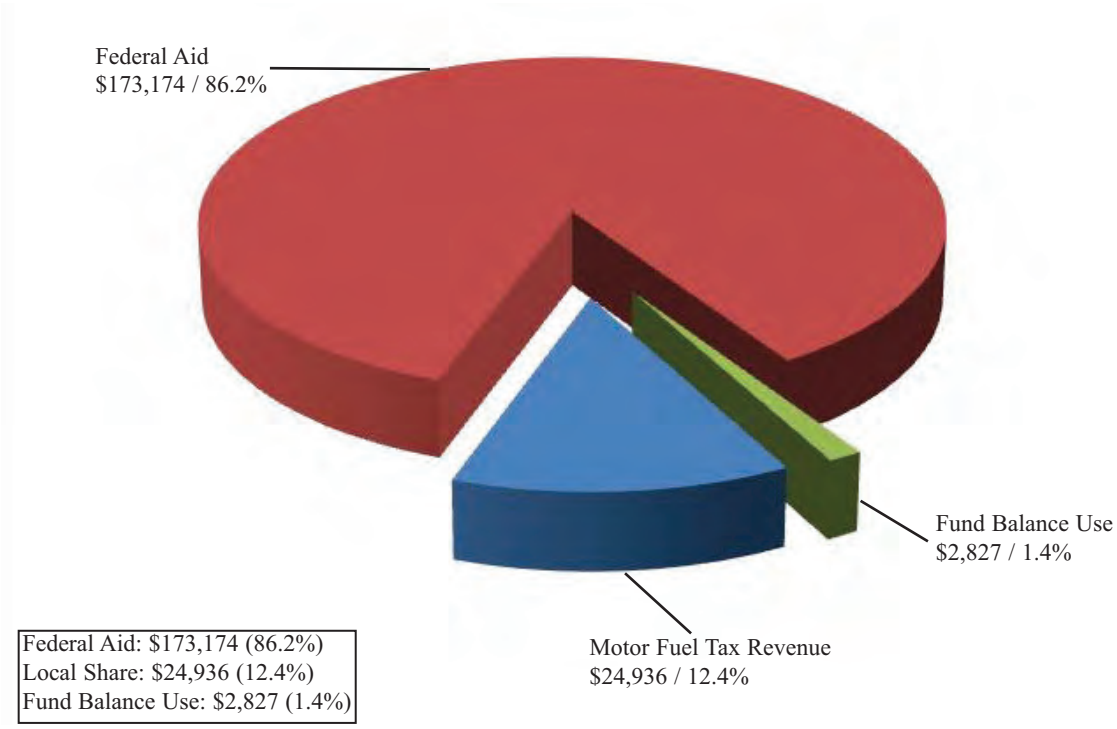
(Dollars in Thousands)



Highway Trust Fund Revenue

The HTF budget is proposed to be distributed between the seven master projects shown in Figure H-2. Budget is allocated from the master projects based on FHWA approval of federal funding to individual projects. Allocations can only be made to individual projects that are reflected in the approved six-year Transportation Improvement Plan (TIP).

Non-Participating budget will be allocated from local master project LMHTSC, Federal Highway Support. Each year DDOT produces a multi-year HTF financial report as required by D.C. Code § 9-109.02(e) to ensure that there are sufficient financial resources to match FHWA grants for transportation projects. A copy of the report for FY 2016 through FY 2023 is presented in Table H-2.

Project Planning

The TIP is a 6-year financial program that describes the schedule for obligating federal funds to state/District and local projects. DDOT completes a new TIP, processed through the Metropolitan Washington Council of Governments, each year. The TIP contains funding information for all modes of transportation including highways, transit, capital, and operating costs. The TIP (both current and archived versions) can be found on the internet at: http://www.mwcog.org/clrp/projects/tip/.

The TIP represents the intent to construct or implement a specific project and the anticipated flow of federal funds and matching local contributions. The TIP serves as a schedule of accountability to the Federal Highway and Federal Transit Administrations. Their annual review and certification of the TIP ensures the continuation of federal financial assistance for Washington area transportation improvements. Significant District projects in the TIP are the 11th Street Bridge Reconstruction, the South Capitol Street Corridor, the St. Elizabeths Campus Access Improvements, and the Southeast Boulevard from 11th Street Bridge to Barney Circle.

To ensure that DDOT can obligate all of its federal funds each year, the TIP contains more projects than DDOT has funding to complete. This strategy allows DDOT to implement alternative projects should there be an unexpected delay or if the agency should receive additional funding authority from the FHWA during their annual "August redistribution" process. August redistribution is the process by which states that do not obligate 100 percent of their authority within the fiscal year must forfeit any remaining authority. FHWA then redistributes this authority to those states that obligated 100 percent of their authority during the fiscal year and have projects that are shovel ready. DDOT requests budget authority of $200,936,599 for HTF projects in FY 2018.

Highway Trust Fund Cash Prospective (Notes)

1. The beginning balance reflects the amount of unspent obligations carried forward from the previous fiscal year in support of long-term Capital Investment.
2. Federal aid apportionment is the funding provided by the Federal Highway Administration (FHWA) in each fiscal year. The FY 2018 anticipated apportionment of $173,173,599 and the FY 2018 – FY 2023 anticipated annual apportionments of approximately $173,173,599 each, includes the August Redistribution. For FY 2018 through FY 2023, funding has been conservatively flat-lined.
3. Grant Anticipation Revenue (GARVEE) debt service. Payment on the District's obligations for debt service on bonds secured by a lien on federal transportation funds received from the Federal Highway Administration.
4. Project Cost (Design/Construction) represents the planned expenditures for all phases of approved federal highway projects.
5. Non-Participating Costs are those costs not eligible for federal aid match. This includes labor and overhead costs not covered by FHWA. Also included are miscellaneous costs/reimbursements that may possibly be converted to federal reimbursement upon approval by FHWA at a later date, or will be reimbursed by another entity.

(KA0) DEPARTMENT OF TRANSPORTATION

MISSION

The District Department of Transportation (DDOT)'s mission is to enhance the quality of life for District residents and visitors by ensuring that people, goods, and information move efficiently and safely, with minimal adverse impact on residents and the environment.

BACKGROUND

DDOT oversees and maintains 7,700 intersections (1,450 signalized); 1,652 traffic signals; 1,495 linear miles of sidewalks; 1,392 linear miles of roadways (interstate highways and neighborhood streets); 358 linear miles of alleys; 228 bridges (209 vehicle, 19 pedestrian); 16 tunnels and underpasses; 13,525 parking meters for 18,000 metered parking spaces; 140,000 street trees; 69 miles of bike lanes and 56 miles of trails. Additionally, DDOT has responsibility for the District's bicycle and pedestrian facilities, traffic and pedestrian safety, and managing the District's public space and rights-of-way.

CAPITAL PROGRAM OBJECTIVES

1. Maintain and enhance the District's transportation infrastructure (roads, bridges, tunnels transit system, signage, and sidewalks) and streetscapes.
2. Increase non-vehicular transportation modes to meet the mobility and economic development needs of the District.
3. Improve the safety of pedestrians, cyclists, and drivers throughout the District.

Elements on this page of the Agency Summary include:

- **Funding Tables:** Past budget allotments show the allotment balance, calculated as allotments received to date less all obligations (the sum of expenditures, encumbrances, intra-District advances and pre-encumbrances). Agencies are allowed to encumber and pre-encumber funds up to the limit of a capital project's budget authority, which might be higher than allotments received to date. For this reason, a negative balance on a project sheet does not necessarily indicate overspending or an anti-deficiency violation. A negative balance is permitted in this calculation of remaining allotment authority.

- **Additional Appropriations Data ($000):** Provides a summary of the budget authority over the life of the project. The table can be read as follows:

  - **Original 6-Year Budget Authority:** Represents the authority from the fiscal year in which budget was first appropriated through the next 5 years.

  - **Budget Authority Through FY 2022 :** Represents the lifetime budget authority, including the 6 year budget authority for FY 2017 through FY 2022.

  - **FY 2017 Budget Authority Revisions:** Represents the changes to the budget authority as a result of reprogramming, redirections and rescissions (also reflected in Appendix F) for the current fiscal year.

  - **6-Year Budget Authority Through FY 2022 :** This is the total 6-year authority for FY 2017 through FY 2022 including changes from the current fiscal year.

  - **Budget Authority Request Through FY 2023 :** Represents the 6 year budget authority for FY 2018 through FY 2023.

  - **Increase (Decrease) :** This is the change in 6 year budget requested for FY 2018 - FY 2023 (change in budget authority is shown in Appendix A).

- **Estimated Operating Impact:** The agency summary of all projects with operating impacts that the agency has quantified, the effects are shown, by type, in the respective year of impact.

- **FTE Data (Total budget in FTE Table might differ from actual budget due to rounding):** Provides the number for Full-Time Equivalent (FTE) employees approved as eligible to be charged to capital projects by, or on behalf of, the agency. Additionally, it provides the total budget for these employees (Personal Services), the non personnel portion of the budget in the agency's capital plan, and the percentage of the agency CIP budget from either expense category.

- **Facility Location Map:** For those agencies with facilities projects, a map reflecting projects and their geographic location within the District of Columbia.

KA0-AW000-SOUTH CAPITOL STREET CORRIDOR

Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Implementing Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Project No: AW000
Ward:
Location: VARIOUS
Status: In multiple phases
Useful Life of the Project: 30

Description:
The proposed improvements to South Capitol Street are intended to realize the vision set forth in the L'Enfant Plan through downgrading South Capitol Street from an expressway to an urban boulevard and gateway to the District of Columbia's Monumental Core. A key feature of this project will be the construction of a new and architecturally significant Frederick Douglass Memorial/South Capitol Street Bridge. This structure will spark the transformation of the South Capitol Street corridor and create a world class gateway between the east and west sides of the Anacostia River. Additional park lands will be created in the area adjacent to the new bridge to promote liveable communities, expand recreational options, and reconnect the city to the Anacostia riverfront. Economic development opportunities will be created and improved connectivity for residents will be provided to federal installations and job centers, including enhanced access to the Department of Homeland Security, U.S. Navy Yard, Bolling Air Force Base, the Anacostia Annex, and Andrews Air Force Base in Maryland.

KA0-HTF00-11TH STREET BRIDGE

Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Implementing Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Project No: HTF00
Ward:
Location: WARDS 6 & 8
Status: Completed but not closed
Useful Life of the Project:

Description:
This project serves as the debt service payment for the 11th Street Bridge GARVEE Bonds. The 11th Street Bridges design build project represents a significant step forward in DDOT 's Anacostia Waterfront Initiative infrastructure endeavor. The project will improve mobility by providing separate freeway and local traffic connections to area roadways. Providing these connections will allow for the creation of the "Grand Urban Boulevard" envisioned for the South Capitol Street Corridor. The project provides multi-modal transportation options for cars, pedestrians, bicycles, and the future DC Streetcar; replaces existing structures that are both functionally deficient and structurally obsolete; provides an additional alternate evacuation route from our Nation's Capital; and supports the overall environmental mission of the Anacostia Waterfront Initiative. The first phase of the innovative design build to budget project started construction in December 2009, and is scheduled to be completed in 2013. This project is the largest project ever completed by DDOT and is the first river bridge replacement in the District of Columbia in more than 40 years. Completing this project will improve travel for both local and regional traffic.

KA0-MNT00-MAINTENANCE

Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Implementing Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Project No: MNT00
Ward:
Location: DISTRICT-WIDE
Status: In multiple phases
Useful Life of the Project:

Description:
Any routine preventive maintenance or minor rehabilitation project including, but not limited to, typical maintenance program, resurfacing, sealing, pothole repair; streetlight and signal maintenance not including major upgrades (which would be in “operations” section), and asset management.
a. Bridge rehabilitation and maintenance (self explanatory)
b. Interstate (projects on streets functionally classified as interstates or freeways)
c. Primary (projects on streets functionally classified as National Highway System routes or Major arterials)
d. Secondary (projects on streets functionally classified as minor arterials or collectors – technically local street projects are not “regionally significant” and therefore need not be in the TIP at all, nor are they eligible for highway trust fund investment anyway so these would be scrubbed out)
e. Pedestrian and bicycle facilities (sidewalks, cycle tracks, and trails)

Related Projects:
Budget for the Master projects is allocated to individual projects as they are approved by the Federal DOT to receive budget. The individual projects within each master project can be found on the TIP at http://www.mwcog.org/clrp/projects/tip/

KA0-MRR00-MAJOR REHABILITATION, RECONSTRUCTION, REPLACEMENT

Agency: DEPARTMENT OF TRANSPORTATION (KA0)

Implementing Agency: DEPARTMENT OF TRANSPORTATION (KA0)

Project No: MRR00

Ward:

Location: DISTRICT-WIDE

Status: In multiple phases

Useful Life of the Project:

Description:

Any rehabilitation projects in excess of $5M, all street reconstruction projects, all major streetscape projects, all new construction or vehicle lane additions. This would include significant transportation construction projects that integrate multi-modal facilities such as transit, multi-use trails, etc. in the appropriate corridor(s).

a. Bridge replacement
b. Interstate (interstate or freeway)
c. Primary (NHS or other major arterial)
d. Secondary (minor arterial or collector)
e. Pedestrian and bicycle facilities (sidewalks, cycle tracks, and trails)

KA0-OSS00-OPERATIONS, SAFETY & SYSTEM EFFICIENCY

Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Implementing Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Project No: OSS00
Ward:
Location: DISTRICT-WIDE
Status: In multiple phases
Useful Life of the Project:

Description:
Any projects with a primary focus of improving the safety and efficiency of our transportation system. In practice, this involves a variety of safety initiatives including engineering, safety education programs and campaigns meant to reduce crashes, fatalities, injuries and property damage. The category also includes Intelligent Transportation Systems and architecture, congestion management and traffic management to maintain functional mobility on District roadways for people and freight, while also addressing impacts to local communities.
a. Traffic operations and improvements including ITS
b. Signal and streetlight system operations and upgrades
c. Safety program
d. Safe Routes to School
e. Livable Streets
f. Freight and motor coach program
g. Parking program

KA0-PM000-PLANNING, MANAGEMENT & COMPLIANCE

Agency: DEPARTMENT OF TRANSPORTATION (KA0)

Implementing Agency: DEPARTMENT OF TRANSPORTATION (KA0)

Project No: PM000

Ward:

Location: DISTRICT-WIDE

Status: In multiple phases

Useful Life of the Project:

Description:

Any projects that identify transportation needs, set strategic objectives, develop best practices & recommendations and/or evaluate project alternatives (such as corridor studies, area studies, feasibility studies, plans, etc). Any activities approved for funding under the State Planning and Research program including, but not limited to, data collection and analysis, programming, plan development, and performance measurement. Any training or staff development activities and any compliance review or reporting activities are included as Management and Compliance including, but not limited to right of way management, environmental review and clearance (NEPA) and compliance review, enforcement or reporting associated with other federal or local statute.

a. State planning and research
b. Right of Way management
c. Environmental clearance
d. Training
e. Civil Rights and ADA compliance

KA0-STC00-STREETCARS

Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Implementing Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Project No: STC00
Ward:
Location: H ST/BENNING RD NE
Status: In multiple phases
Useful Life of the Project:

Description:
This project funds planning that improves the quality, efficiency and safety of streetcar service and promotes economic development along the H Street/Bennning Road NE corridor. The H/Benning Streetcar Line will make travel along the corridor much easier for residents, workers and visitors and complement the existing transit options.

KA0-ZU000-TRAVEL DEMAND MANAGEMENT

Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Implementing Agency: DEPARTMENT OF TRANSPORTATION (KA0)
Project No: ZU000
Ward:
Location: DISTRICT-WIDE
Status: In multiple phases
Useful Life of the Project:

Description:
Any projects that employ strategies to reduce single occupancy driving in the city and seek to reduce roadway congestion. This includes services and facilities that promote safe and attractive walking and bicycling as well as programs that promote mass transit, and other creative ways to provide alternatives to auto travel as well as significant outreach, education and promotion. Intermodal facilities that also promote non-single occupancy vehicle travel are included as well.
a. Bicycle and Pedestrian Management Program
b. Commuter Connections
c. Bike share and bike station
d. Intermodal facilities

Related Projects:
Budget for the Master projects is allocated to individual projects as they are approved by the Federal DOT to receive budget. The individual projects within each master project can be found on the TIP at http://www.mwcog.org/clrp/projects/tip/

(Dollars in Thousands)

Appendix I

Appendix I
The District of Columbia Water and Sewer Authority
FY 2017 - FY 2026 Capital Improvement Program

Overview

The District of Columbia Water and Sewer Authority ("DC Water") is an independent agency that provides essential retail water and wastewater services to over 672,000 residents and businesses, and 21.3 million annual visitors. DC Water also provides wholesale wastewater conveyance and treatment services to more than 1.6 million residents in Prince Georges and Montgomery Counties in Maryland, and Fairfax and Loudoun Counties in Virginia. Governed by an eleven member regional Board of Directors ("Board"), DC Water maintains and operates the water distribution system, sanitary and combined sewage systems, and Blue Plains, the largest advanced wastewater treatment plant in the world.

The development and adherence to a capital improvement program and financial plan have been critical factors in implementing rate increases on a gradual and predictable basis, and maintaining strong bond ratings. DC Water's credit ratings as of April 2016 are AAA/Aa1/AA. These favorable ratings help reduce the interest rates DC Water pays on its debt borrowings, resulting in lower bills for customers

Financial Policies

The Board has adopted a series of key financial policies: capital financing and reserves, rate-setting and budgetary, debt, and cash management and investment. These policies serve as key parameters used to successfully develop DC Water's capital and operating budgets, and the ten-year financial plan. The policies will continue to guide the development and implementation of the Authority's long-term financial plans.

Capital Improvement Program

Since its formation in 1996, DC Water has successfully undertaken significant efforts to improve its financial position and operations, a critical part of which has been the development and implementation of the Capital Improvement Program (CIP). DC Water's enabling legislation requires a five-year financial planning period. However, because DC Water operates under a regulatory and capital project-driven environment, it uses a ten-year planning horizon for the CIP. The CIP enables DC Water to meet its key goals of providing the best service possible to its retail and wholesale customers, reducing long-term operating costs, meeting regulatory requirements, and continuing activities as an environment steward. The ten-year financial plan integrates the impact of the CIP with DC Water's Board policies, strategic plan, priorities, and provides guidance in several key financial areas.

This CIP includes mandated projects as well as rehabilitation of assets required to meet permit requirements and service needs. Further, the CIP implements the water and sanitary sewer investments adopted by the Board to replace our aging infrastructure.

On December 1, 2016, the Board approved the FY 2017 - FY 2026 capital disbursement plan in the amount of $3,751,623,000 and the related lifetime budget in the amount of $10,949,419,000. The lifetime budget is the full budgeted amount for projects, which are active within the ten-year CIP, including expended and anticipated amounts to complete the projects. The capital disbursement plan is mainly an estimate of cash flows or actual spending on projects.

DC Water Fiscal Year 2018 Congressional Capital Authority Request

DC Water's FY 2018 capital authority request in the amount of $3,244,625,000 includes projects within the FY 2018– FY 2026 planning period. This capital budget authority request represents the total amount required for this time period. For informational purposes, the following provides an overview of the major service areas for projected capital expenditures, recognizing that actual expenditures for individual service areas may vary up or down, subject to but not to exceed the amount of $3,244,625,000. An overview of the CIP project categories is outlined below.

Non Process Facilities Authority Request: $51,336,000

Projects within this new service area were reprogrammed from Wastewater Treatment, Combined Sewer Overflow, Sanitary Sewer, and Water service areas. These projects, which generally improve DC Water's operations, do not per-se represent a core business process. Capital projects primarily include construction or renovation to administrative space.

Wastewater Treatment Authority Request: $720,917,000

DC Water receives and treats wastewater at the Blue Plains Advance Wastewater Treatment Plant collected from the aforementioned jurisdictions. Plant facilities process liquids from sanitary wastewater and stormwater as well as process residual solids removed during the liquids process.

DC Water's wastewater treatment plant is rated for an average flow of 370 million gallons per day (MGD), and is required by its National Pollutant Discharge Elimination System (NPDES) permit to treat a peak flow rate of 740 MGD through the complete treatment process for up to four hours, and continuous peak complete treatment flows of 511 MGD thereafter. The Plant treats these flows to a level that meets one of the most stringent NPDES permits in the United States. Additionally, up to 336 MGD stormwater flow must receive partial treatment, resulting in a total plant capacity of 1,076 MGD.

Capital projects in the wastewater treatment area are required to rehabilitate, upgrade or provide new facilities at Blue Plains to ensure that it can reliably meet its NPDES Permit requirements and produce a consistent, high-quality dewatered solids product for land application.

Combined Sewer Overflow Authority Request: $1,155,759,000

Similar to many older communities in the Mid-Atlantic, Northeast, and Midwest sections of the country, a portion of the District is served by a combined sewer system. Approximately one-third of the system is combined, mostly in the downtown and older parts of the City. In dry weather, the system delivers wastewater to the Blue Plains Wastewater Treatment Plant. In wet weather, rainwater is captured by this system, and if the conveyance capacity of the system is exceeded, the excess flow spills into the waterways of the District.

There are 47 active Combined Sewer Overflow (CSO) outfalls in DC Water's NPDES Permit. This service area includes projects that will reduce the number of overflows by 96 percent over a 20-25 year period, as well as rehabilitate, replace, or relocate combined sewer facilities throughout the District.

CSO includes a variety of capital improvement projects throughout the system including two large tunnel systems, which will accommodate the storage of CSOs from storm events until they can be conveyed to Blue Plains for treatment. DC Water is currently engaged in implementing its DC Clean Rivers project for CSOs that discharge to the Anacostia River, Rock Creek and the Potomac River. This project is mandated in a Federal Consent Decree between the United States, the District Government and DC Water. The consent decree was entered by the Court in March 2005 and was modified in January 2016 to allow for large-scale green infrastructure installations and other modifications to the Clean Rivers project impacting the Potomac River and Rock Creek. The Clean Rivers project is by far the largest portion of this service area, and the schedule for completion spans over a 25-year period, ending in 2030

Stormwater Authority Request: $21,349,000

Over 34 miles of rivers and streams in and around the District do not support swimming and all forms of aquatic life. Stormwater runoff from separated and combined sewers is the primary source of pathogens that cause impairments to the District's local waterways. The District's stormwater has approximately 600 miles of stormsewer pipes, catch basins, inlets, special structures and related facilities.

The District Government is responsible for operation, some capital replacement and management of the separate stormwater system under a MS4 (stormwater management) permit issued by the federal government. The central responsibility for managing the system lies with the District's Department of Energy & Environment (DOEE). Since 2007, DOEE has been responsible for the separate stormwater system and compliance with the Clean Water Act as the stormwater administrator. Among other things, DOEE coordinates the MS4 task force, making recommendations regarding stormwater priorities, goals and recommendations on the adequacy of funding mechanisms for stormwater management activities.

Several capital projects have been included to relieve local flooding and to address short-term needs for improvements to the stormsewers located in separate and combined sewer areas. In addition, there are projects for stormsewer rehabilitation and projects associated with the District Department of Transportation road projects, which often require relocation of stormsewers, inlets or other structures.

Sanitary Sewer Authority Request: $475,214,000

DC Water is responsible for wastewater collection and transmission in the District, including operation and maintenance of the sanitary sewer system of approximately 600 miles of large interceptor sewers and smaller gravity collection sewers, for a total of about 1,800 miles of sewer pipe. DC Water is also responsible for sewer lateral connections from the sewer pipes to the property lines (in public space) of residential, government, and commercial properties. In addition, DC Water is responsible for the 50-mile long Potomac Interceptor System, which provides conveyance of wastewater from areas in Virginia and Maryland to Blue Plains. The existing sanitary sewer system in the District dates back to 1810, and includes a variety of materials such as brick and concrete, vitrified clay, reinforced concrete, ductile iron, plastic, steel, brick, cast iron, cast-in-place concrete, and even fiberglass.

In 2009, DC Water completed the Sewer System Facility Plan, which is currently being updated. This document culminated a five-year effort involving sewer inspection and condition assessment, development of a sewer GIS database, hydraulic monitoring and modeling to assess system capacity and the development of prioritized activities for system improvements.

Aging sanitary infrastructure repairs and replacements include capital projects for sewer laterals, existing pumping stations and large diameter sewers.

Water Authority Request: $580,569,000

DC Water distributes safe, clean drinking water to customers throughout the District, and continues to comply with all federal and local regulations. Capital projects in the Water Service Area are designed to maintain an adequate and reliable potable water supply to customers and for fire suppression.

The water distribution system includes appurtenances necessary for proper system operation, inspection, and repair. DC Water's system includes approximately 1,350 miles of pipe and over 48,979 valves of various sizes. A variety of valve types allow flow control, prevent air entrapment, allow water main draining, permit flow in only one direction, and allow water transfer between service areas during emergencies. The system also includes more than 9,462 hydrants in public space maintained on behalf of the District Government in support of the DC Fire and Emergency Services. The cost of the fire hydrant maintenance is reimbursable and does not affect rate adjustments for customers in the District.

Capital projects include rehabilitation or replacement of water mains, pumping stations and storage facilities, water quality projects, including dead-end elimination, and valve replacement.

Capital Equipment Authority Request: $138,170,000

Capital equipment includes major information technology infrastructure and software initiatives, replacement or refurbishment of large equipment, vehicle fleet upgrades, and replacement of advanced water meter infrastructure.

Washington Aqueduct Authority Request: $101,311,000

The Washington Aqueduct (Aqueduct) supplies treated water to distribution systems of DC Water, Arlington County, Fairfax County Water Authority (collectively, the Aqueduct Customers), the federal government, and other parts of northern Virginia. Under federal legislation enacted and a memorandum of understanding executed in 1997, the Aqueduct Customers have a role in the oversight of the Aqueduct's operations and its capital improvement program. DC Water is responsible for managing the treated Water System that serves the District and several other governmental customers outside the District. DC Water purchases approximately 73% of the finished water produced by the Aqueduct; Arlington County and the Fairfax County Water Authority purchase the remainder. The Aqueduct has developed a capital improvement program, including improvements to the Dalecarlia and McMillan Water Treatment Plants, raw water conduits, pumping stations and reservoirs.

GOVERNMENT FINANCE OFFICERS ASSOCIATION

Distinguished Budget Presentation Award

PRESENTED TO

District of Columbia Government

District of Columbia

For the Fiscal Year Beginning

October 1, 2016

Executive Director

The Government Finance Officers Association of the United States and Canada (GFOA) presented a Distinguished Budget Presentation Award to District of Columbia Government, District of Columbia, for its annual budget for the fiscal year beginning October 1, 2016. In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, as an operations guide, as a financial plan, and as a communications device. This award is the seventeenth in the history of the District of Columbia.

This award is valid for a period of one year only. We believe our current budget continues to conform to program requirements, and we are submitting it to GFOA to determine its eligibility for another award.
